DETAILED ACTION

1. Claims 1-23 are pending.
2. Claims 14-16 and 23 have been amended.

Response to Arguments

3. Applicant's arguments, see page 7, filed 13 June 2005, with respect to claims 1-23 have been fully considered and are persuasive. The rejection of claims 1-23 has been withdrawn.

Allowable Subject Matter

4. **Claims 1-23** are allowed.
5. The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for restricting access to network data by using authentication of system identity. Each independent claim identifies the uniquely distinct features "**reading, with root as an effective user id, one or more security keys into a cache, wherein the root as effective user id enables the reading of root-only readable files including the one or more security keys accessed by a non-root user**". The closest prior art, Shambroom (US Patent No. 5,923,756) discloses a method and apparatus is disclosed for enhancing the security of a remote command execution over an insecure computer network, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious. The closest prior art, Schell et al. (US Patent No. 6,615,350) discloses an apparatus, system, and method to

provide an initial and an on-going authentication mechanism, with which two executable entities may unilaterally or bilaterally authenticate the identity, origin, and integrity of each other, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

6. Therefore, **claims 1,6,9,13,16, and 17** and the respective **dependent claims 2-5,7-8,10-12,14-16, and 18-23** are in condition for allowance.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
